ACTIVITIES

- Subcontractor for metal spinning. We produce circular parts for all kind of industries. We realize design and production of tools, prototypes, pre-production models and industrial manufacturing.

MATERIALS AND KNOW HOW

- We can produce parts up to 3500mm diameter
- Stainless steel up to 10mm thickness
- Steel up to 12mm thickness
- Aluminium up to 20mm thickness
- Copper
- Brass
- Lead
- Niobium
- Titanium
- Nickel alloys

SOME EXAMPLES

- Nuclear supplies (Production and waste treatment)
Tanks, distillation columns
- Storage and transportation of radioactive combustible and wastes.
Storage Wells, containers, gloves boxes
- Scientific Search
Niobium or Copper Accelerating cavities, cyclotrons, Industrial accelerators
- Ship-building
Dished heads, Hydraulic coupling, capsizing
- Gas Turbines
Statics and dynamics parts made of Nickel Alloys (Intake cones, diffusers)
- Windmills
Propeller cones, ball-bearing cages
- Electricity transport
HT connections and couplings

Total employees : 23

2009 Turnover : 2,1 M€

Certifications :

- ISO 9001 V2000
- DESP (Materials working under pressure)
