D'HUART INDUSTRIE is a  
CALDER Group company

Total employees : 49

2011 Turnover : 17 M€

Accreditations :  
ISO 9001:2008  
ISO 14001:2004

DHI is a leading supplier of  
radiation shielding products  
to the French nuclear  
industry and a specialist of  
lead engineering products  
and services to a wide  
customer base

D'HUART INDUSTRIE is a leading specialist in lead engineering. It is one of Europe's largest producers of radiation shielding for the power, medical, defense, research and scientific markets;

## ACTIVITIES

With more than 70 years manufacturing experience, D'HUART INDUSTRIE continues to grow in strength through ongoing investment in new manufacturing techniques in order to meet the future requirements of its customers.

Our qualified staff oversees the manufacturing process from ingot to finished product. From gravity castings, pressure injection die-casting, rolling and cutting, extrusions, machining or boiler making, D'HUART INDUSTRIE is capable of delivering those products to the exact requirements of its customers.

## PRODUCTS - SERVICES

D'HUART INDUSTRIE produces products for radiation and X-ray shielding :

**Ready to use products :** bricks to the CEA EURATOM standards, wool and shot, rolled sheet lead self-adhesive or not,

**Plates and rafters:** D'HUART INDUSTRIE develops shielding from rolled and machined lead plates, for non-destructive control testing, control of welding, light beams and synchrotrons.

Lead strips with assembly out of rafters like bricks, but flexible in dimension for installation of shielding for oncology suites, medical imagery or tomography.

**Containers:** Our comprehensive product range includes: containers and vessels for the transport and storage of medical isotopes, nuclear power plants radioactive wastes, the transport or loading of fuel transportation, or for measurement or detection devices.

**Lead assemblies:** D'HUART INDUSTRIE collaborate in the design process of its customers and manufactures. This includes full-line suppliers and operators, lead elements and subcomponents for: Glove Boxes, Hot cells, shielded hutches, transfer elements for vessels, lead glass window frames, remote handling casing, Synchrotron or light sources hutches.

**Duct and pipe shielding.**
