Total employees : 210

2012 Turnover : 17 M€

Certifications :

- CEFRI E
- ISO 9001 V2008
conformity accepted by
EDF in CAS 1 ASR
- EDF-UTO qualification
in :
« Electricité & contrôle
commande »,
« Contrôles, Analyses,
Mesures & Essais » and
« Prestations
Intellectuelles et
Assistance Technique »

OUR MISSION

SITES' mission is to observe, measure, analyse, quantify and study sensitive structures, with the aim to:

- assist construction and assembly work to ensure quality;
- monitor their behaviour to enhance durability and security and
- optimize maintenance cost.

OUR ASSETS

- Engineering : writing of maintenance & operation guides and procedures; structure analysis;
- Visual and televisual inspection : pipe inspection with SIT'M; cooling tower inspection with Scansites; crack mapping; non-destructive testing;
- High accuracy surveying; levelling; photogrammetry; geometric scanning; 3D dimensional metrology and Lidar;

- Instrumentation: static and dynamic instrumentation; optical fibre sensor technology, mechanical and electrical instrumentation (inclinometry, strains, temperature, displacements, vibrations, telemetry) sensor design and installation; seismic and vibratory analysis; low frequency measurements;
- Information systems development for data acquisition and analysis;
- Technical assistance;
- A team of multi-disciplinary technicians and engineers to provide global assistance to nuclear power plants and research, oil and gas industry and civil engineering.
